

MARSHALL HAYMOND

720-666-2548 | marshallhay@msn.com | linkedin.com/in/marshall-haymond | github.com/HaymondM

Senior Software Engineer with 3+ years of experience designing, building, and supporting enterprise web applications across the full development lifecycle. Proficient in TypeScript/JavaScript, Java, Angular, React, Node.js, Python, and SQL, with experience in REST API design, secure authentication, and agile delivery. Proven ability to collaborate across teams, mentor junior engineers, and translate complex business requirements into reliable, maintainable software

Relevant Experience

Fidelity Investments

Jan 2023 - Present

Senior Software Engineer

Salt Lake City, Utah

- Partnered with non-technical stakeholders and compliance teams to gather requirements and translate business rules into software specifications, ensuring alignment across engineering and business functions
- Built systems emphasizing auditability, traceability, and data integrity, enabling risk-aware decisioning and compliance requirements
- Reduced technical debt and optimized service performance, contributing to a ~15% reduction in cloud costs while improving system efficiency and scalability
- Improved CI/CD pipelines to support safe, incremental software releases, reducing deployment time by ~25% and improving overall release reliability and production stability
- Applied test-driven development practices and contributed to code reviews to improve software quality, reduce defect rates, and enforce engineering standards across backend services
- Contributed to security code reviews and engineering best practices, improving reliability, security posture, and maintainability across backend services handling sensitive data
- Participated in on-call rotation, diagnosing and resolving production incidents across distributed systems, including API failures, data inconsistencies, and service outages
- Implemented monitoring and observability using DataDog and CloudWatch to detect anomalies, improve system reliability, and proactively identify potential failure points

Full Stack Engineer Intern

Jun 2022 - Aug 2022

- Designed and evaluated authentication and identity validation workflows, implementing secure access controls and multi-factor authentication (MFA)
- Delivered full-stack web application features end-to-end, including UI components, server-side logic, and API integration, in a fast-paced agile environment
- Researched, evaluated, and proposed two-factor authentication (2FA) solutions to strengthen web application security

Education

Western Governors University

Jun 2024 - May 2025

Master of Science, Cybersecurity and Information Assurance

- Prominent Coursework: Data Privacy & Protection, Cloud Security, Penetration Testing, Secure Software Design, Compliance Frameworks (NIST, ISO 27001)

Brigham Young University

Aug 2019 - Jul 2022

Bachelor, Computer Science; Minor in System Administration

- Prominent Coursework: Algorithms & Complexity, Parallelism and Concurrency, Systems Security, Database Security

Tools and Certifications

Languages

- Languages: Python, TypeScript, Java (Spring Boot), SQL (MySQL, PostgreSQL)
- Angular, React

Cloud & Infrastructure

- AWS: EKS, EC2, ECS, RDS Aurora, S3, IAM, CloudWatch, CloudTrail, Secrets Manager, Lambda, VPC
- Docker, Kubernetes, Helm, Git, Jenkins, DataDog, Terraform
- Systems & Concepts: Distributed systems, microservices architecture, REST APIs, observability, fault tolerance, CI/CD, secure authentication

Certifications

- AWS Certified Cloud Practitioner
- CompTIA CySA+, CompTIA PenTest+
- Machine Learning & AI Certification Brigham Young University

Leadership

Fidelity Next Step Network

Nov 2024 - Present

Mentor

- Provided technical and career guidance to incoming engineers, including security best practices and compliance awareness, helping them build skills relevant to their roles and ramp up effectively
- Facilitated knowledge-sharing sessions covering team workflows, tooling, security protocols, and expectations to accelerate onboarding
- Served as a point of contact for questions on engineering practices, career growth, and navigating company processes
